## Genii Advanced Modular Calibration System

# A higher bar for ultra low pressure

Ideal for testing and calibration in the pharmaceutical and semiconductor markets, **Druck's PV624 with the new PM620LP ultra-low pressure module** offers a reliable solution for calibration from  $\pm 2.5$  mbar (1 inH<sub>2</sub>O) to 20 bar (300 psi).

## Genii Advanced Modular Calibration System

# A higher bar for ultra low pressure

Druck's PV624 is an automatic low pressure controller, combined with hybrid high pressure controller to create a range flexible pressure calibration system.

The release of the **PM620LP** **pressure module** enables ultra-low pressure calibration down to  $\pm 2.5$  mbar (1 inH<sub>2</sub>O).

Users can interchange modules to achieve a rangeable pressure calibration system.
